CONTINUUM

=

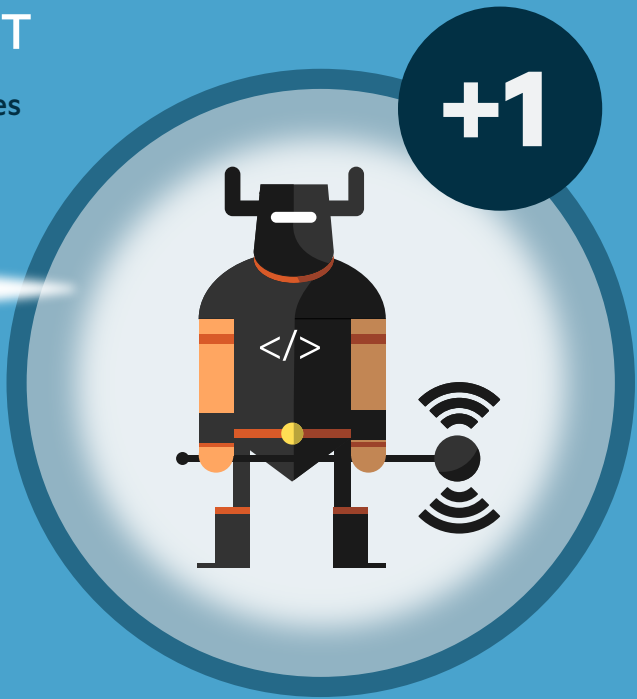

DRIVING CONTINUOUS IMPROVEMENT

- Understand and improve our current practices and capabilities
- Increase ability to respond to changing business conditions
- Better leverage innovation

Assessing team or organizational capabilities in responding to change

Planning and executing improvements to existing practices

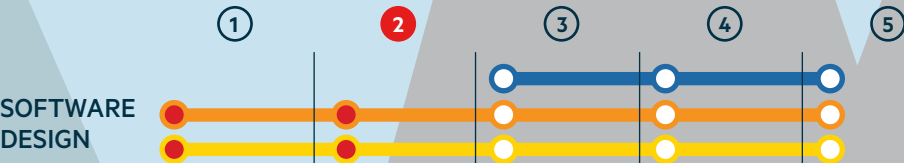

This process provides insight and guidance rather than serves as a compliance tool

CONTINUUM HELPS YOU LEVEL UP!

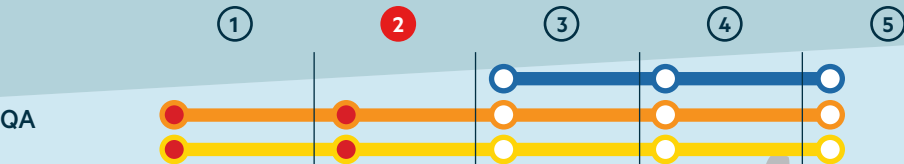

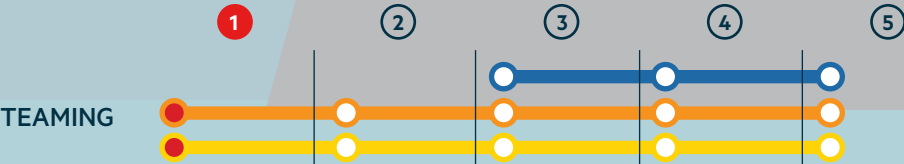

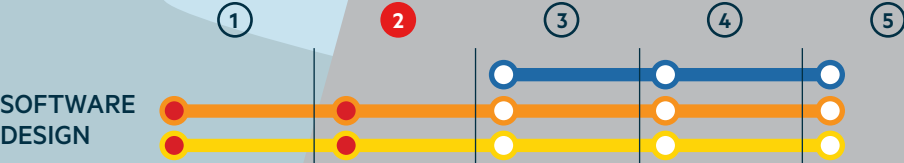

HOW DOES IT WORK?

1. Assess current practice of all skills

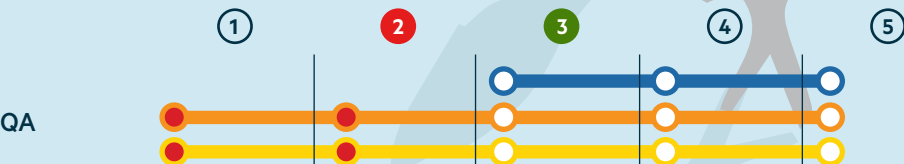

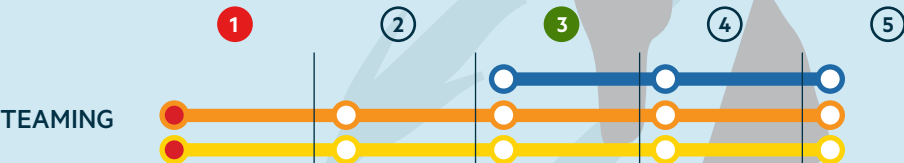

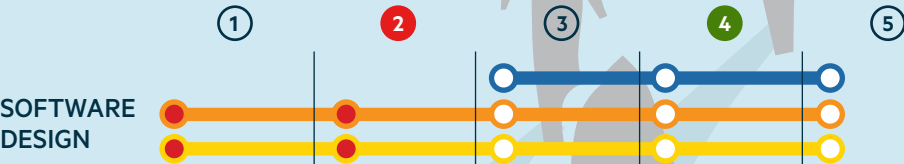

PLOT ON SKILLS SKILLS TREE - Mark which attributes are attained

2. Team decides on 3 priority skills to level up

3. Agree on target state for each skill

4. Prepare a time bound action plan to reach that level

Time to target state
- action
- action

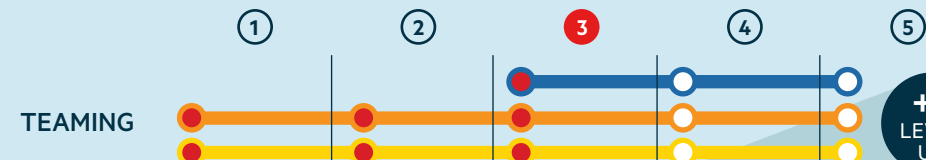

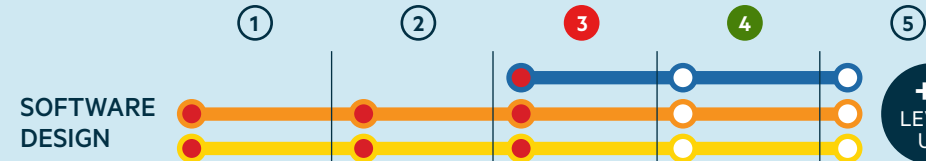

Time to target state
- action
- action

Time to target state
- action
- action

5. Assess all skills and progress towards target states periodically

Cannot jump the levels - must have attained all attributes to level up in a skill

CONTINUOUSLY IMPROVE YOUR SKILLS TO STAY A GRAND MASTER ENGINEER
